

# PASSWORD BOOK PRO APP PRIVACY POLICY

Version, 15 August 2022

The privacy of all our Users is very important to us. We recommend that you read this document carefully.

## 1. What is stated in this Privacy Policy?

The sections in this Privacy Policy inform you about:

- Personal Data
- Privacy and Security
- What will you do if you have questions or comments?

## 2. Personal Data

The application does not request personal data. It does not request, use or record "Personal Data" about who the USER is or any data about the USER's device. **The application has nothing to do with personal data, USER ID or device information.**

## 3. Privacy and Security

a) All data recorded in the application is stored only on the USER's device, encrypted with cryptological methods. The application does not have a connection to any servers or remote databases. There is no such malicious process/function in any part and software of the application. Only in line with the USER's preference, the data can be backed up to his own 'Drive' account, still encrypted. The main purpose of this application is to ensure the privacy of the USER and keep sensitive data safe by encrypting it. The application is extremely secure and it is the USER's responsibility to keep their data safe. By using the application, the USER is deemed to have accepted this responsibility and explanations. If the USER does not trust the application or does not want to keep his confidential data in the application, he can remove the application from his device or only use the password generator.

b) The USER must never forget the "Application Login Password" or "Main Password" that the USER has determined in the application. This is the only password the USER needs to remember. The USER should keep this password in mind as it is not stored anywhere else and cannot be recovered. Because the data security of the USER is provided by encrypting it with this password according to cryptological methods. In case of forgetting/not remembering this password, although the application can be entered using "Fingerprint" or "Easy Login" methods, this password is needed to determine "Data Backup" or "Login Methods". The USER should never forget this password. In case of forgetting this password, WE are not responsible for any data loss or adverse situations. The USER has to remember his own password, and this password cannot be recovered, deciphered, recovered or detected neither by US nor by other methods. The application is designed in this way for the security of the USER and its data. It is the USER's own responsibility to protect this password and the data stored in the application.

#### 4. What will you do if you have any questions or comments?

If you have any questions or comments regarding this Privacy Notice or the practice, please contact us by sending an email to the address below.
